

Frequently Asked Questions

What does it treat?

Fraxel is a cosmetic procedure that helps treat the following:

- Fine Lines and Wrinkles
- Brown Spots
- Age Spots
- Sun Damage
- Acne and Surgical scars

Fraxel can be used on all skin types and helps expedite collagen remodeling as well as promoting wound healing.

How long does it take?

Patients should arrive 90 minutes prior to their scheduled appointment time for numbing.

There are two different settings for Fraxel:

- Superficial resurfacing
- Deep. This goes into the dermal and epidermal layers of the skin.
- The procedure is very tolerable and has a warming sensation.

How much does it cost?

Consultation: \$100

Face only: \$1500

Face/Neck/Upper Chest: \$3000

Small Spot on Face: \$500

How many treatments do I need?

Patients will see improvement with just one treatment, but may require multiple treatments to achieve their desired result. Treatments are spaced one month apart.

Does it hurt?

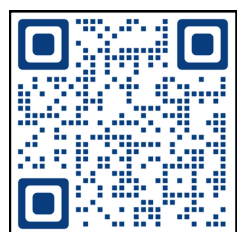

The procedure is very tolerable and has a warming sensation. Patients should arrive 90 minutes prior to their scheduled appointment time for numbing.
